PROJECTS

Exclusive Commerce-
The aim of the project is to create an online shopping platform that offers a wide range of exclusive products to customers.

Technologies Used-
HTML, CSS, JavaScript , React,Redux-toolkit,SCSS
Learning Outcomes-
Learnt to create a fully responsive website using SCSS. And managing global state using redux.

Weather Today-
The main objective of this application is to provide users with accurate weather information in real-time, making it easier for them to plan their day accordingly.

Technologies Used-
HTML, CSS, JavaScript, React JS, Context API.
Learning Outcomes-
Learnt how to use context API and managing state globally in react without redux.

My TODO-
My Todo is a simple web application built using React.js that helps users keep track of their daily tasks and to-do lists. With the help of this application, users can add, edit, delete and mark tasks as complete or incomplete.

Technologies Used-
HTML, CSS, JavaScript, React
Learning Outcomes-
Learnt how to use React hooks. Passing data to each components with the help of props and how react works under the hood.
